PIERRE LEMÉE // SOFTWARE ENGINEER

MALE // 40 YO // FRENCH

INTRO

I build web apps the you play Lego ©, tech being an endless box with infinite pieces and possibilities without limits.

Code is my passion, I like this craftsmanship job for the creativity it requires. Even after 15+ years of work, I keep learning on a daily basis. Nevertheless, I keep following philosophies like egoless programming or boring tech.

I have a polyvalent profile, halfway between senior developer, devops or data engineer. I've been a CTO and a manager for several years, and if today I'd prefer to contribute by writing code, I can lead and / or mentor a team.

TECH

Here are the technologies I'm confident with:

PHP · Symfony · Typescript · Python · Django · Flask · Javascript · Nest · MySQL · PostgreSQL · Vue · React · Bash · Git · Bootstrap · Tailwind · Java · Spring boot · Ansible · CI (Circle / Github actions) · Playwright · AWS · Metabase · RabbitMQ · Redis · Elasticsearch (ELK) · Hadoop

PROFESSIONAL EXPERIENCE

FREELANCE

FULSTACK DEVELOPER // 2022 - NOW

Over the last years, I had the chance to practice, as a freelancer, senior fullstack developer roles :

- Mon Indemnisation Justice: french State startup, through the Beta.gouv program, of the *Ministère de la Justice* of which I'm building the entire application.
- Akeneo: I setup internal web APIs to serve AI models designed by ML engineers.
- Underdog: I had the chance to contribute to the setup of first software tools to manage and sell reconditioned products.
- APiLos: french State startup, through the Beta.gouv program, that aims to digitalise social housing conventions. I ran the old data ingestion from the former database to help put the application to production.

Typescript · Python · Django · React · Nest · PostgreSQL · Vue · Git · CI (Circle / Github actions) · Metabase · Redis · Playwright

IGNITION PROGRAM

CTO // 2020 - 2022

I managed the tech team of**Ignition Program** which grew to 10 people under my command. After a year of rewriting the historical codebase, I worked on improving processes toward a much more performing product structure via setup of empowered squads.

Python Django Javascript PostgreSQL Vue Git
Ansible CI (Circle / Github actions) Metabase AWS

BLOOM AT WORK (LUCCA)

CTO // 2018 - 2020

My first mission was to convert the MVP tool, first used for internal needs at *My Little Paris* to a fast, efficient and scalable B2B app for **Bloom at Work**.
I then staffed my development team and setup first processes aiming to satisfy user expectations and reach the startup goals and ambitions.

PHP Symfony Javascript MySQL Git React
Ansible CI (Circle / Github actions) AWS Metabase RabbitMQ
Redis

BILLOGRAM (🇸🇪)

DEVELOPER / DEVOPS // 2017

In 2017, I lived in Sweden where I had the chance to join **Billogram** and its *platform team*.
I worked both on code and infrastructure sides.

PHP Python Flask Javascript MySQL
Bash Git CI (Circle / Github actions) Redis

SENSCRITIQUE

CTO // 2016

My first CTO role was at **Sesncritique**
I setup right processes to allow tech team to lead long term projects, like mobile app creation, and treat recurring fastlane requests. I also had to make server infrastructure evolve (bare metal) to make the app scale with our users number.

PHP Java Spring boot > Javascript MySQL
Bash Git CI (Circle / Github actions) Redis

BLABLACAR

DEVELOPER // 2014- 2016

I had the privilege to join the tech champion and carpooling leader: **BlaBlaCar**.
I first worked on developing new features on the web app, before forming a team dedicated to create a scaling big data platform for analytical needs.

PHP Symfony Javascript MySQL Bash
Git Bootstrap Java CI (Circle / Github actions) RabbitMQ
Redis Elasticsearch (ELK) Hadoop

ALTRAN (CAPGEMINI)

DEVELOPER // 2013- 2014

I was a consulting developer for Gemalto and a projet of contact less payment.
My responsibility was to write J2EE code as well as ensuring system integration.

MySQL Bash Java

THALÈS ALENIA SPACE

DEVELOPER // 2011- 2013

During my apprenticeship, I developed and maintained a Java based simulation environment for high resolution satellite images generation.

Bash Java

DIVERS

Beside my maternal language, French obviously, I speak a fluent **English**, I could attend a conversation in Spanish and can identify words in **Italian**, **German** or **Swedish**.

On my spare time I like watching films et TV shows. Whenever I can I listen to music (mostly electronic, ambient, rock and jazz) on my vintage turn table. I play **golf** and I strive to run regularly.

I like to taste a good wine, beer or whisky, or play *mots fléchés* (french equivalent of crossword puzzles), I even made an app for this.

I currently live in Nantes after 10 years in Paris. I'm the proud daddy of a young girl.

SCHOOLING

SOFTWARE ENGINEER

CFA AFTI (ORSAY) // 2013

This cursus taught me technics of software engineering. Beyond simple coding base, I learned methods for leading IT projects.

LICENCE INFORMATIQUE

UNIVERSITÉ OF CAEN // 2009

During this licence, I formed the baseline of my technical knowledge: code discovery, algorithms, web technologies, database & SQL, systems and networks
